Other benefits include:

Stimulation of digestive system,
Improved bowel function,
Internal organ massage,
Clearing of toxins from the body.

How We Aim to Achieve These Benefits:

We use the development and award scheme which records and rewards progress.

For those with profound and complex needs, we use the **Huddersfield Functional Index** in conjunction with the development scheme.

The added benefits of stimulation of the digestive system, improved bowel function and internal organ massage are achieved by the rhythmic acceleration and deceleration, and increase and decrease in weight offered by movement on the trampoline.

The clearing of toxins from the body is a process brought about by bouncing on a trampoline causing stretching and contracting of cells in the body.
