

The perfect complement for Rebound Therapy. Use at home

The bellicon® rebounder is the perfect product to complement Rebound Therapy®. Whereas Rebound Therapy sessions in schools and centres on a full sized trampoline are generally held only once a week or so, the rebounder can be used in the home at any time to practice and build on the programme provided by the therapist / trainer. The product is highly durable and has a softer, slower bounce than most other rebounders on the market. It is the only rebounder approved by the governing body for Rebound Therapy.

Product specification

The recommended product to complement Rebound Therapy comprises:

- bellicon rebounder with blue powermesh bed
- orange frame pad
- set of medium rope rings.

The bed is available in the following sizes: 100cm, 112cm or 125cm. Soft rope rings are recommended for light and non ambulant users, medium rope rings are recommended for adult or ambulant users.

bellicon will make a donation to the Federation of Disability Sports Organisations equal to 5% of the purchase price for every unit ordered online using this web address: www.bellicon.com/en/reboundtherapy, or using the order form which can be downloaded from www.reboundtherapy.org/bellicon_fdso

To receive the Rebound Therapy exercise sheet for this product, please contact info@reboundtherapy.org
